As challenging as it might be, let’s keep the focus!

Your strategy for 2025 must take our new reality into account

Keep an eye on consumer sentiments	Canadians are slightly more optimistic, but sentiments towards tariffs could impact our industry
Need-based consumers are challenging loyalty	**Brand loyalty is at risk** as Canadians are looking to fulfill specific needs, leaving emotions behind
Consumers looking for value everywhere	Brands need to understand what's driving consumers to different stores and changing overall dynamics
Fish where the fishes are!	Need to capitalize on emerging consumer groups and upcoming trends in food & beverage
